Engineered Stone Pavers

Orca's ingenuity, innovation and commitment to sustainability has produced a new paving product that re-purposes recycled bin glass from landfill.

This innovative new paving product is manufactured in Australia, using glass recycled from landfill and patented technology. Featuring up to 80% recycled glass content, this striking range of pavers deliver on form, function and lifetime cost benefits. Orca pavers embrace design flexibility, offering customised colours and sizes for a bespoke aesthetic.

Engineered to perform, Orca pavers deliver up to three times the compressive strength of concrete. Durable and low maintenance, these pavers are designed to wear rough for long-life slip resistance and carry the highest P5 rating. These high-quality pavers offer structural integrity and UV resistance to perform under the most punishing conditions.
